

9000 Series Miniature Rail Stage

With miniature rail bearings and a short stroke leadscrew with a Delrin nut assembly, the series 9000 provides linear movement from a wide range of small motors. The compact design allows installation in tight spaces for remote adjustment of focusing, tension, sensor position and many other continuous movement applications.

Specification

Travel mm	10
Drive	Delrin Nut on leadscrew, 1mm pitch
Accuracy	+/-10µm
Load Capacity (kg)	
Horizontal	2
	1
Weight (kg)	0.5
Materials	Alumium Alloy and stainless steel

Options:-
